# MEDICAL LANGUAGE IN FOREIGN LANGUAGES AND ROMANIAN LANGUAGE. ENGLISH LANGUAGE ELECTIVE COURSE

**TARGET AUDIENCE:** II<sup>ND</sup> YEAR STUDENTS IN THE MEDICINE  
UNDERGRADUATE PROGRAMME, WITH AN INTERMEDIATE LEVEL OF  
GENERAL ENGLISH (B1 LEVEL)

# OBJECTIVES

The development of integrated receptive and productive skills in medical English – reading, writing, speaking, listening – in different situations of medical life, such as: reading genuine medical documents (case studies, referral letters, blood tests, case notes, discharge summaries); writing medical documents (filling in case notes, discharge summaries and referral letters, writing medical articles); developing communication skills by using dialogues related to the medical profession (history taking – asking specific questions related to the history of the disease, signs and symptoms, family history, examining the patient and giving instructions, recommending investigations, discussing diagnosis and treatment, preparing and making a speech at a medical conference); developing listening skills by means of audio and video exercises (doctor-patient dialogues, presentation of clinical procedures and surgical interventions).
